# 11 (1) 66 HUNTINGTON, OHIORIVER.

The City of Huntington, which is situated on the south bank of the Ohio viver intended to afford a practical exemplificaamediately below the mouth of the Guyandotte, having a frontage of nearly fou iles on the Chio, and of one mile on the Guyandotte, has been carefully surveyed nd a large part of it laid out into lots witable for residences and for manufacuring, mercantile and other business purposes. This property possesses advantages which are attracting to it a large popula-

on. Some of these advantages are as follows, viz:

(1). It is situated at the head of reliable nanigation on the Ohio river, being below (1). It is situated at the head of reliable navigation on the Ohio river, being below the Grayandotte Bar and the numerous other shoals above, which prevent the Contigencies (payable by all students) per term, and the standard point where ice prevents navigation is the winter months, and thus has direct and uninterrupted connection with eighteen thousand miles of water navigation.

(2). It is on the line of and noar the Western terminum of the product of the standard per term, let use the standard per term, let use the continuous of the standard per term, let use the standard per te point where ice prevents navigation is the winter months, and thus has direct and uninterrupted connection with eighteen thousand miles of water navigation.

Chesapeake & Ohio Railroad,

Which, as a Great East-and-West Trun't Line, by reason of its short line, east company the short line, east company the short line, east company to the short lin enryatures, low grad s, and the advantages of economical operations toughout winter term per week, the year, must command an immense through and way traffic and tray between Washing per dezen the Western States and the Atlantic seaboard.

be made at the city of Huntington with Railroads extending through the entire West and Northwest, farniture other that those mentioned above, must be furnished by the student.

and here will be established the principal machine, manufacturing and repair shops I the Company, contracts for which have already been awarded and work on their ommenced. Important railroad connections with the Southwest will also be made it this point; and within a very few years it will be the terminus of six or seve aportane rattroads, of unecting with the Chesapeake & Ohio railroad and eac other. (3). As a manujacturing centre, the city of Huntington has advantages which ar anequalied at any other point in the valley of the Ohio. It is in the immediat: icinity of the extensive iron beds of Southern Chio and West Virginia; and the opening of he Chesapeake and Ohir railroad will give easy and cheap access to the inexhaustible coal fields of the Great Kanawha and its tributories, which are known to be superior to all others in the United States for the variety, the superior quality and the abundant quantity of the coals which they contain. It is here aton at the peculiar Splint Coal, which proves to be a valuable substitute for charcoal in Watches, Je velry, Clocks, producing the host qualities of pig iron, is found in quantities and under circum-tances that render it available. Here, also, timber abounds in great variety and of easy accessibility. The region is celebrated for the great abundance and excellent justity of its bickery and oak.

(4) As a commercial centre, the city of Huntington will occupy an important po ition on the Great Trunk Line of Railway, which the Chesapeake and Ohio Railroad and its connections will form between the deep waters of the Chesapeake Bay and the great rivers of the West at the head of reliable navigation, and it will therefore bethe great rivers of the West at the head of reliable navigation, and it will therefore become a natural and convenient point for the interchange, on an extensive scale, of H. H. MADDOX the great staples of the West and Southwest and the products of the manufacturng States of the East and of Europe. (5) As a place of residence, no more inviting locality can be found than the

ity of Huntington. In addition to the natural beauty for which the site is remarkable, and its genin addition to the natural beauty for which the site is remarkable, and its genial, healthful climate, the proprietors have at great cost, laid out the city upon a plan
made a specialty. Repairing done on
advantage of convenience, comfort and arrangement for the gratification of refined and cultivated taste. With these objects in view, the Avenues and Screets
have all been made of sufficient width to allow the subtraction of convenience. have all been made of sufficient width to allow the cultivation of ornamental trees, and yet leave abundant room for roadway and sidewalks.

Each lot intended for a residence is large enough to allow space for the culti-

vation of a garden, fruit trees and shrubbery. On the Avenues where it is suposed lots will be selected for the better class of residences, lots will only be sold ubject to conditions which will forever prevent nuisances in the vicinity.

A system for grades for all the avenues and streets has been established upon a plan which can be easily and economically adopted, and which is adapted for

there is no debilitation, so there is n education of their children and wards, in the higher branches of learning at mod-nausea or sickness attending the opera erate cost, in an Institution of well-established reputation. erate cost, in an Institution of well-established reputation.
